EXP 2	Design of the Organization Form

Aim:

To create the Organization form with Organization Name (unique), Type, City and Mentor Contact Email.

Theory:

- **Organization Name:** Single line, mandatory and unique.
- **Type:** Drop-down with MNC, Startup, PSU, Research Lab, Academic.
- **City:** Single line.
- **Mentor Contact Email:** Email field.

Procedure:

1. Create a new form named Organization from scratch.
2. Add a Single Line field named Organization Name and tick Mandatory and No duplicate values.
3. Open Settings > Application IDE > Organization and add Type, City and Mentor Contact Email.
4. Save the script.

Program (Organization form):

```
form Organization
{
    success message = "Organization Added Successfully"
    Section
    (
        type = section
    )
    must have unique Organization_Name
    (
        type = text
        displayname = "Organization Name"
    )
    Type
    (
        type = picklist
        values = {"MNC","Startup","PSU","Research Lab","Academic"}
    )
    City
    (
        type = text
    )
    Mentor_Contact_Email
    (
        type = email
        displayname = "Mentor Contact Email"
    )
}
```

Output:

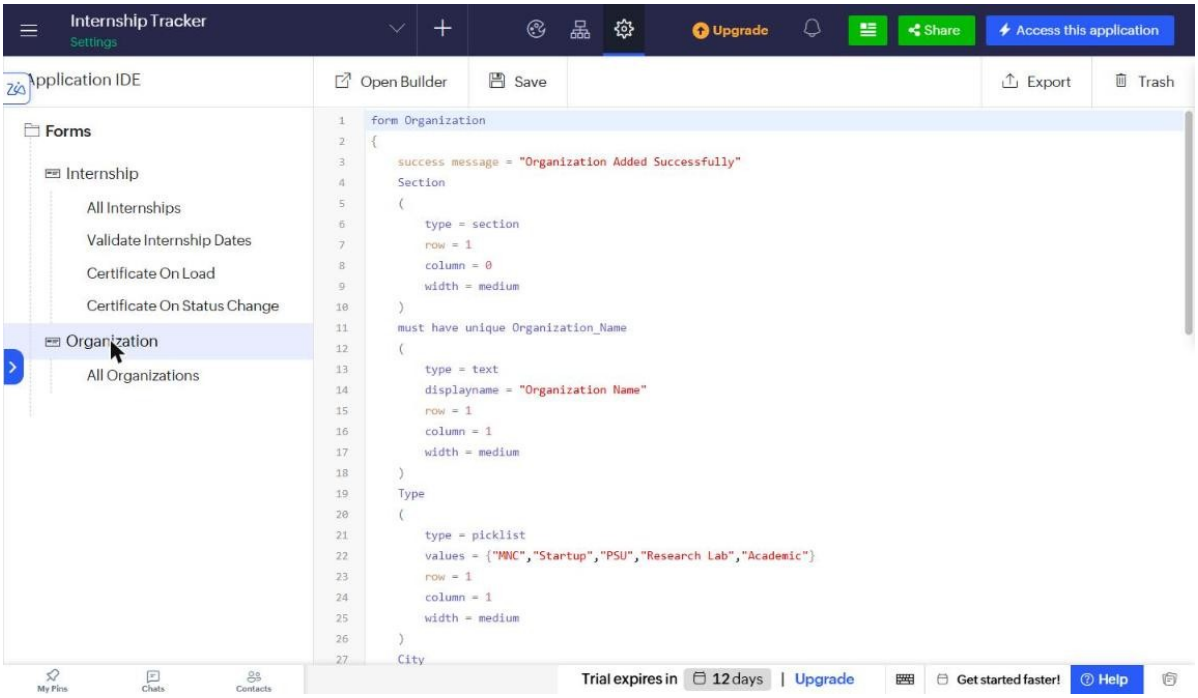

Fig. 2.1: Organization form script in the Application IDE

Result:

The Organization form was created with a unique Organization Name and the required fields.
