EXP 3	Design of the Internship Form

Aim:

To create the Internship form with the student and internship details.

Theory:

Fields: Register Number, Student Name, Year (3, 4), Organization, Domain (AIML, Web, Data Analytics, IoT, Cloud, Other), Mode (On-site, Remote, Hybrid), Start Date, End Date, Duration in Weeks, Stipend per Month, Offer Letter, Completion Certificate and Status (Ongoing, Completed, Discontinued).

Procedure:

1. Create a new form named Internship with the Register Number field.
2. Open the form in the Application IDE.
3. Add Student Name, Year, Domain, Mode, Start Date, End Date and Status with the values listed above.
4. Save the script.

Program (Internship form - basic fields):

```
form Internship
{
    success message = "Internship Added Successfully"
    Section
    (
        type = section
    )
    must have Register_Number
    (
        type = text
        displayname = "Register Number"
    )
    Student_Name
    (
        type = text
        displayname = "Student Name"
    )
    Year
    (
        type = picklist
        values = {"3","4"}
    )
    ...
    Domain
    (
        type = picklist
        values = {"AIML","Web","Data Analytics","IoT","Cloud","Other"}
    )
    Mode
    (
        type = radiobuttons
        values = {"On-site","Remote","Hybrid"}
    )
    ...
    Status
```

```
    (
        type = picklist
        values = {"Ongoing","Completed","Discontinued"}
    )
}
```

Output:

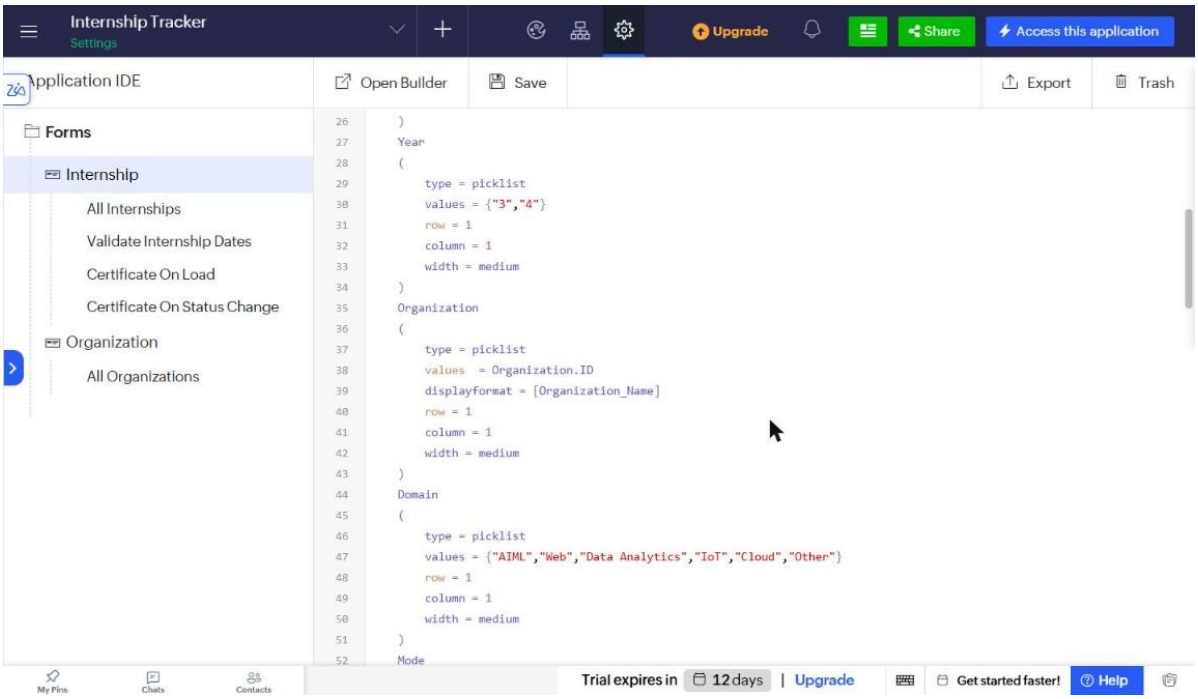

Fig. 3.1: Internship form fields in the Application IDE

Result:

The Internship form was created with the required student and internship fields.
