EXP 4	Lookup Field Between Internship and Organization

Aim:

To link each internship to an organization using a lookup field.

Theory:

A lookup field stores a reference to a record of another form. The Organization field of the Internship form shows the Organization Name of the Organization form.

Procedure:

1. In the Internship form add the field Organization with values = Organization.ID.
2. Set displayformat = [Organization_Name].
3. Save and open the live Internship form to check the drop-down.

Program (lookup field):

```
    Organization
    (
        type = picklist
        values  = Organization.ID
        displayformat = [Organization_Name]
    )
```

Output:

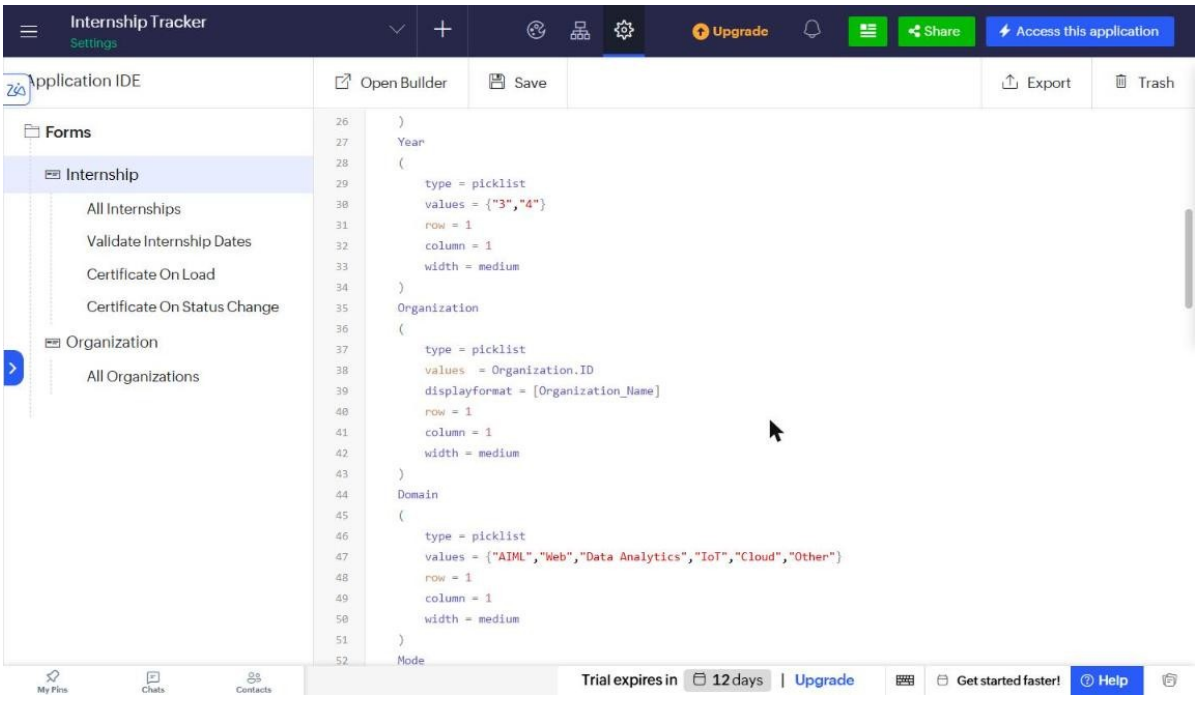

Fig. 4.1: Organization lookup field in the Internship form

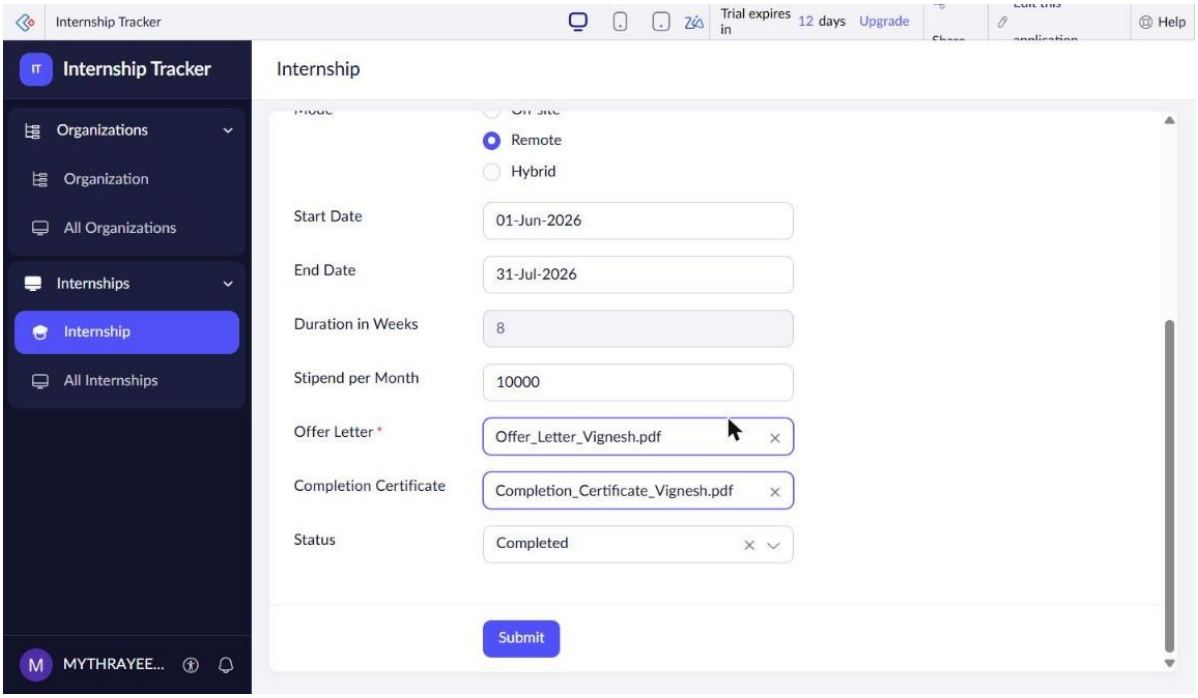

Fig. 4.2: Organization selected in the live form

Result:

The Internship form is linked to the Organization form through the Organization lookup field.
