EXP 5	Duration in Weeks Formula Field

Aim:

To calculate the internship duration in weeks automatically using a formula field.

Theory:

A formula field calculates its value from other fields. Duration in Weeks = (Start_Date.daysBetween(End_Date) / 7).toLong(), which gives the number of completed weeks.

Procedure:

1. Open the Internship form in the form builder.
2. Drag a Formula field into the form and enter the expression (Start_Date.daysBetween(End_Date) / 7).toLong().
3. Name the field Duration in Weeks and tick Make field visible in the form.
4. Enter Start Date 01-Jun-2026 and End Date 31-Jul-2026 in the live form.

Program (formula field):

```
Duration_in_Weeks
(
    type = number
    displayname = "Duration in Weeks"
    Formula_Properties
    (
        value =  (input.Start_Date.daysBetween(input.End_Date) / 7).toLong()
        visibility = true
    )
)
```

Output:

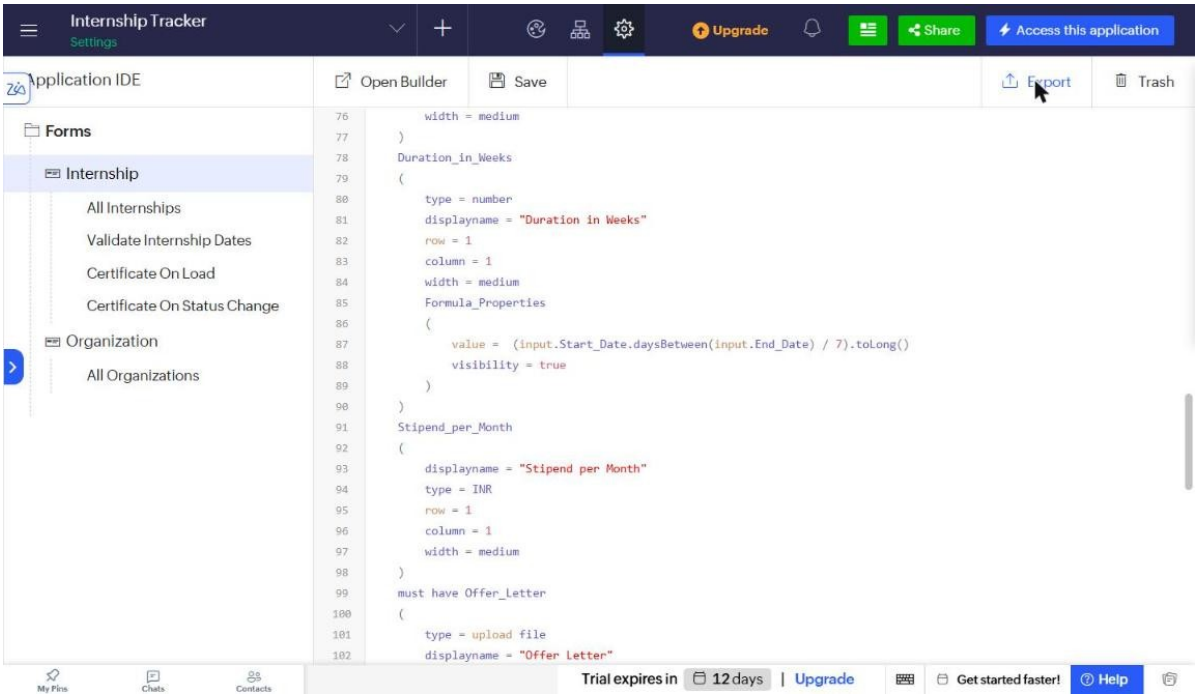

Fig. 5.1: Duration in Weeks formula field

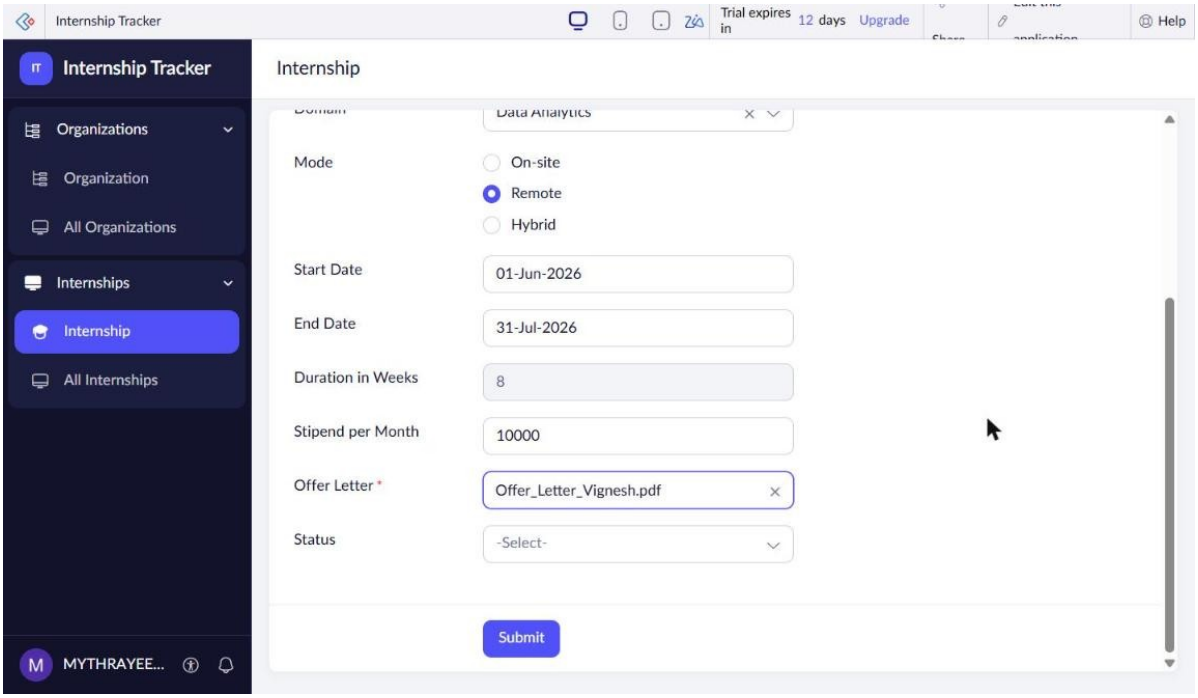

Fig. 5.2: Duration shows 8 weeks

Observation:

Start Date	End Date	Duration in Weeks
01-Jun-2026	31-Jul-2026	8

Result:

The Duration in Weeks field shows 8 weeks for the test dates.
